North Carolina Department of PUBLIC INSTRUCTION | CARNEGIE LEARNING

# What could your math team do with more support?

Find out with a state-funded professional learning and coaching initiative for math educators and school leaders in grades 6–8.

## In partnership with NCDPI

We've partnered with the North Carolina Department of Public Instruction (NCDPI) to offer a fully funded, job-embedded professional learning pilot (Patterns® for North Carolina) that builds lasting instructional capacity and supports the transition to revised state math standards.

## What's included in the free school cohort package:

- **One onsite launch day:** One full day of facilitator-led professional learning to align on the district's shared instructional vision for mathematics, build content confidence, and prepare teacher teams for implementation.
- **Up to five days of onsite coaching:** In-classroom support focused on coaching, co-planning, observation, feedback, and student work analysis.
- **North Carolina experience for small teacher teams:** Complete enrollment in North Carolina Patterns courses, instructional modules, and participant materials for middle grades educators.
- **Leadership alignment access for up to two administrators:** Specialized enrollment in a Leadership Patterns course to align principal walkthroughs, observation tools, and coaching feedback with daily classroom practice.
- **Pre- and post-implementation inventories:** Data-driven baseline and growth analytics to measure teacher confidence, content mastery, and classroom impact.

Patterns®

## How North Carolina Patterns delivers results

- **Content mastery in high-leverage domains**
  Specific modules developed for North Carolina standards, including a Ratios and Proportions course and an additional Data and Statistics module.
- **Job-embedded classroom application**
  Shifting beyond traditional one-off workshops into ongoing classroom support to foster student-centered mathematical discourse and conceptual understanding.
- **Sustainable leadership alignment**
  Equipping principals, assistant principals, and instructional coaches with observation tools and feedback frameworks to support high-quality math teaching long after the program concludes.

## Grow your reach and leadership beyond the cohort

- **Expanded Teacher Participation:** Opportunities for larger middle schools to enroll up to 124 additional teachers beyond the base 5-teacher cohort.
- **Math Leadership and Teacher Leader Academy:** Dedicated statewide enrollment for up to 100 additional district leaders, specialists, and coaches to build system-wide coaching capacity.

## Deadlines and next steps

- **Two Cohorts to Fit Your Schedule:**
  Choose the spring or fall cohorts to align with your district's schedule and timelines. Registration for the spring cohort closes January 8, 2027, and registration for the fall cohort closes June 1, 2027.
- **Limited Capacity:**
  Secure your school's spot! Space in this state-funded opportunity is limited.
- **Next Steps & Contact Info:**
  For more information, please reach out to your Carnegie Learning representative.
